

Illia's Developer Portfolio

About Me

Hi! My name is Illia, I'm 15 years old and a beginner programmer. I've been learning Python and C++ for about a year. I enjoy building console-based programs, such as simple games and utilities. I'm actively improving my skills and looking for small real-world projects or internships to gain experience.

Skills

- Languages: Python (basic), C++ (basic)
- Experience: writing logic-based and console applications
- Tools: Visual Studio Code, Git (beginner), terminal
- Learning: Object-Oriented Programming (OOP), data structures

Projects

Python Mini Game

- A small console game built in Python.
- Uses basic game logic: loops, conditions, and random numbers.
- Language: Python
- GitHub link: (coming soon)

C++ Chess Board

- Console-based chessboard display (no gameplay).
- Built using 2D arrays and character output.
- Language: C++
- GitHub link: (coming soon)
